Rabbi Josef Ekstein
Director Dor Yeshorim
Committee for Prevention of Jewish Genetic Diseases
160 Wilson Street Ste.1B
Brooklyn, NY 11211

City of
Cambridge

Dear Rabbi Ekstein:

Although we might never capture in a letter just how grateful we are for your participation in **Genes In Primary Care--What You Really Need To Know**, we will give it our best shot!

Thank you for working with us to coordinate a stimulating curriculum and for actively participating in the dialogues which ensued over the course of the three days. Our hope is that you gained an even deeper understanding of the importance of educating practicing physicians in the rapidly changing discipline of medical genetics. Ultimately you have all played a part in helping the first class of participants improve their ability to deliver more comprehensive care to their patients with genetic diseases.

Harvard
Medical
School

It was clear to us that we managed to attract the best and brightest faculty! Hopefully at the very least, you all enjoyed each other's work! We also managed to find a group of practicing physicians who are deeply curious about their work and who understand the challenge of providing quality patient care. We are truly honored that you saw the need for this course and were moved by your willingness to join us. We would like to encourage you to stay in touch and will update you on the progress of future endeavors. Please do not hesitate to contact us and for your enjoyment we have enclosed several newsclips. Additional print and broadcast media features are pending and we will do our best to keep you informed.

Thank you again for your adventurous spirit and your dedication to education. It was a pleasure to work with you and to engage you in this most important conversation.

David Housman, Ph.D.
Professor in Biology
M.I.T.

Dear Rabbi Ekstein,

Thanks so much! Your participation introduced a lot of doctors to some new concepts of what can be accomplished. I will be sending you another article on Caudron's for your files as well.

Best -
